## NSF / ANSI 372

SSM<sup>®</sup> METER

SSMRS<sup>®</sup> METER

The SSM<sup>®</sup> series have stainless steel meter bodies, tested and certified to NSF/ANSI 372 for lead free compliance and meet or exceed AWWA specifications. The SSM<sup>®</sup> Multi-Jet meter has a long meter life and good tolerance to contaminants. The series is well suited for industrial, commercial and residential applications. The dry sealed registers are easy to read and will retain their clear view display. The SSM<sup>®</sup> series meter is available in sizes from 5/8" x 1/2" to 2" with maximum flow rates up to 160 GPM and pressures up to 150 psi. Registrations are available in gallons, cubic feet or liters.

The SSM<sup>®</sup> meter is a totalizing multi-jet meter for those applications that only need to read the totalized flow at the meter. The SSMRS<sup>®</sup> which is equipped with a reed switch for a dry contact electrical output.

**\*Continuous Flow:** The size of meter selected should be based upon continuous flow, GPM, as opposed to pipe size. For example, if it is determined that continuous flow is 25 GPM, a 1" meter should be selected rather than a 3/4" meter.

**ORDERING INFORMATION:** Select the meter model number from the Meter Selection Chart above.

Add a **G** for Gallon reading or a **C** for Cubic Feet reading or an **L** for Liters reading.

Example: 1 1/2" Meter with Cubic Feet register = 150SSM-C.

## SSM® METER SPECIFICATIONS

- Reed Switch:** Dry contact type, normally open, 24V, 100mA maximum
- Pressure Rating:** Maximum 150 psi.
- Temperature Range:** 35° - 122°F. Protect the meter from freezing.
- PH Level Range:** 6.5 – 8.0
- Accuracy:** +/- 1.5% of maximum flow when operating between minimum and maximum flow range.
- Register Options:** U.S. Gallons, Cubic Feet and Liters

### Installation Instructions:

1. Flush the line thoroughly after all plumbing changes to prevent contaminants from entering the meter.
2. Install horizontally with the register facing up and inlet port facing the water supply line.
3. For outdoor installation, protect meter from direct exposure to the elements.
4. Protect meter from backflow of water opposite of indicated flow direction.

### Helpful Hints:

1. All values used in a water line need to be operated slowly, and all electrically actuated valves should be slow closing. This will eliminate possible meter damage from water hammer in your system. Carlon offers an excellent slow closing valve (SCV).
2. Install a strainer upstream of your water meter to protect the meter and any other in-line process equipment from becoming jammed by particulate matter.
